

# Get Fit App

Made by:

Austin Ottinger, Rishabh Mittal,  
Mihir Jham

# Functionality

- Login to account, create one if you don't have one
- Select meal/food item eaten to store info on
- Post button to store meal
- Graph displays calorie count for each day in current month
- Graph page also shows max, min, and avg calorie intake for current month
- Meal table shows meals eaten for each day in current month

# Database and Networking

- For networking, a server is used to receive requests from the app to store info or request info from database
- Database is used to store a table of user accounts and a table of the meal, calorie count, and date for each meal a user has eaten

# Contributions

- Austin worked on the backend for the app itself, sending requests to the server and parsing data received from the server
- Mihir worked on the server itself, and set up the database
- Rishabh worked on the front-end of the app, designing and creating the layout and user interface
